TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, C#, PHP
- Frontend Technologies: HTML, CSS, React.js, React Native
- Backend & Frameworks: Spring Boot
- Databases: MySQL, SQLite, Firebase
- Tools & Environments: Android Studio, Git, GitHub
- IoT & Hardware: Arduino, NodeMCU ESP8266, Sensor Integration (RFID, PIR, Gas)

SOFT SKILLS

- Complex Problem Solving
- Team Leadership & Collaboration
- Effective Communication & Content Creation
- Adaptability & Quick Learning
- Time Management

CAREER OBJECTIVE

Motivated software engineering student seeking an internship or entry-level position to leverage expertise in web, mobile, and IoT technologies to build innovative solutions.

BIMSARA KAUSHAL

Software Engineer Undergraduate

PROFILE

Dedicated Software Engineering student currently pursuing a Higher National Diploma at NIBM, possessing a versatile skill set across full-stack web development, mobile applications, and IoT solutions. Proven ability to design, build, and deploy robust systems utilizing Java, Spring Boot, React.js, and PHP. Adept at database management and hardware integration, with a strong commitment to writing clean, maintainable code and delivering user-centric software solutions.

EDUCATION

- **Higher National Diploma in Software Engineering**
National Institute of Business Management (NIBM) | Apr 2024 – Present
- **Diploma in Software Engineering**
National Institute of Business Management (NIBM) | Nov 2023 – Nov 2024
- **G.C.E. Advanced Level**
R/Kolonna National School | Jan 2022
- **G.C.E. Ordinary Level**
R/Kolonna National School | Dec 2018

PROJECTS

- **Hospital Management System (Full Stack Application)**
 - Developed a Hospital Management System using Spring Boot for the backend and React for the frontend.
 - Implemented core features such as doctor management, patient registration, and appointment scheduling.
 - Built secure RESTful APIs to enable seamless communication between frontend and backend services.
 - Designed a responsive and user-friendly interface using React to improve hospital workflow and user experience.
- **Smart Harbor System (IoT Project)**
 - Collaborated with a team to design and develop an IoT-based Smart Harbor Management System using NodeMCU ESP8266.
 - Integrated RFID, PIR, gas, and environmental sensors for ship detection, safety monitoring, and container tracking.
 - Helped develop a real-time monitoring dashboard using Firebase for data visualization and improved harbor safety and automation.

EXTRACURRICULAR ACTIVITIES

- **YouTube Content Creator:** Develop, edit, and publish engaging video content, demonstrating strong digital communication and media skills.
- **Cricketer:** Active team player, demonstrating discipline, strategic thinking, and strong collaboration skills.

- **Hotel Management System (Web Application)**

- Developed a full-featured hotel management system using PHP, MySQL, HTML, CSS, and JavaScript.
- Designed a robust MySQL database structure to efficiently manage hotel data, room bookings, customer details, and reservations.
- Created a secure admin panel for streamlined management of operational tasks and user-friendly data handling.

- **Mobile Food Ordering Application (Android)**

- Designed and developed a feature-rich Android application using Android Studio with a focus on clean UI/UX principles.
- Implemented an SQLite local database for efficient, on-device data management.
- Delivered key features including menu browsing, customized ordering, an integrated shopping cart, secure payment simulation, and real-time delivery tracking.
